XELION Business talks.

Applications & Devices

Built for Flexible Working

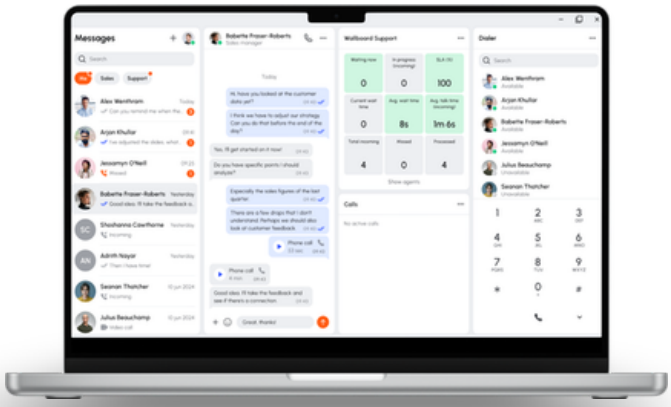

Communicate Your Way

Give your team the freedom to communicate how they want, wherever they work, without changing tools or losing control. Xelion delivers a consistent business communication experience across desktop, mobile, and hardware, all w ithin one platform.

Desktop Application

Total Control in One Place

The Xelion desktop softphone gives users complete control of their communications through a single, intuitive interface.

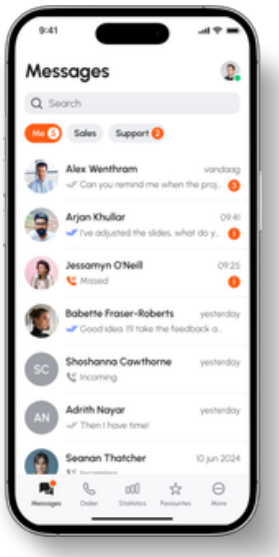

- See real time presence and availability
- Manage calls, contacts, and activity in one place
- Use as a softphone or alongside a desk phone
- Integrated call recording for compliance, training, and quality assurance.
- Access full communication history and insights

Available via the Windows Store and Apple App Store for quick installation and automatic updates.

Mobile Application

Your Business Phone on the Move

Stay connected wherever work takes you with the Xelion mobile app.

- Make and receive business calls on mobile
- Present your business number on every call
- Use click to dial, messaging, and collaboration tools
- Access wallboards and live performance data
- Secure call recording with access to conversations anytime, anywhere.
- Enjoy the same experience as the desktop application

Available on iOS and Android, supporting true mobile and flexible working.

Hardware Support

Flexible by Design

Xelion works with a wide range of devices, giving your business complete flexibility.

- Support for desk phones, cordless handsets, and mobile devices
- Unlimited devices per user
- No restrictions on how or where users connect
- Seamless switching between devices

Your team can choose the device that suits them best, without compromise.
